

I Wish I Was a Fish

Numbers up to 50

I love going to the beach! But sometimes I wish I was a fish and could look **under** the sea! There would be **big** whales and **small** seahorses! I would get to play with an octopus with **eight** arms. I could hide **behind** a coral reef or swim **between** the sea weeds!

LOOKING BACK

Join the dots from 1 to 20 to find one of the most playful and clever animals in the ocean. Then colour it. Can you name the animal?

For the Teacher

The introductory picture can be used to ask questions like:

- How many goldfish do you see in the picture? Make a group of 10 to help you count.
- If 4 more whales join in, how many whales will be there in all?

- Are there more octopuses or sea horses in the picture?
- There are 5 sea stars playing in the sea. Can you tell how many are hiding?

NCF 2023

Competencies in this chapter:
C-8.3, C-8.4, C-8.5: Applicable to the entire chapter
C-8.12: Labelled on specific pages

PLACE VALUE

1, 2, 3, 4, 5, 6, 7, 8, 9

We use only one place to write the numbers 1, 2, 3, 4, 5, 6, 7, 8, and 9. When numbers stand alone, they are in the 'ones' place. Numbers up to 9 are called single-digit numbers.

10 When we use 1 and 0 to write the number 10, we need two places. So, 10 is a two-digit number.

We write '0' in the 'ones' place and '1' in a new place before it called the 'tens' place.

10 ones = 1 ten

A group of fish is swimming together. Count how many in each group. Write the number in the box. Then write the number name.

BEFORE-AFTER-BETWEEN

Watch the jellyfish floating lazily through the water. They often give out light to protect themselves from other sea creatures.

The green jellyfish is **before** the yellow one.

The pink jellyfish is **after** the yellow one.

The yellow jellyfish is **between** the green and the pink ones.

Using the number strip above:

1. Write the number that comes after.

2. Write the number that comes before.

3. Write the number that comes between.

Challenge!

Colour all three shells using the clues. The blue shell is between the green shell and the red shell. The red shell is before the blue shell.

Solve
8/4

COMPARING NUMBERS

Smaller Number

Most sea stars or starfish as they are also called, have 5 arms. Some can have 7 arms while others can have even 10-15 arms.

Colour the sea star with fewer arms and circle the smaller number.

			
7	5	10	6
			
11	13	12	15

Use the number strip to compare.

The number that is closer to zero on the number strip is the smaller number.

Circle the smaller number.

8	9	6	4
18	19	16	12
20	15	9	19
6	14	13	18

Circle the smallest number.

For the Teacher

Prepare cards from 0 to 9. Then prepare cards that are twice the length of the single-digit numbers and write the multiples of 10 up to 90 on those. Numbers are built by placing the single-digit numbers on the '0' of the tens cards to show how the number is formed. Call out any number from 11 to 99. The student then uses the material and builds the number as shown on this page.

The Twenties

(ab)

15/04

Write the number.

COMPARING NUMBERS

Ring the smaller number for each.

Example 1:

A single-digit number is smaller than a two-digit number.

a.

2 10

b.

26 4

c.

8 48

d.

38 3

When both the numbers are two-digit, compare the tens place first.

Example 2:

2 tens is smaller than 3 tens.

e.

20 34

f.

46 25

g.

21 19

h.

40 36

Example 3:

If the tens place is same, compare the ones.

Both the tens are same.

2 ones is smaller than 5 ones.

i.

38 30

j.

47 41

k.

29 26

l.

45 48

Circle the smaller number. Then circle to say whether the digit in the tens place or ones place helped you decide.

Decreasing Order

Look at these numbers:

They are not in continuous order but they are arranged from the **biggest** to the **smallest**.

42 is the **biggest** number in this group.

18 is the **smallest** number in this group.

Write these numbers starting from the biggest at the top of the steps to the smallest on the lowest step.

23 19 37

22 48 32

31 30 36

49 29 39

Mathspeak

How do you know that you have arranged numbers correctly in the decreasing order?

For the Teacher

If the students are familiar with their roll numbers, call out 3 students at random (within roll numbers 1–50) and ask them to arrange themselves in increasing or decreasing order.

ORDER OF NUMBERS

Increasing Order

Look at these numbers:

19

25

40

They are not in continuous order but they are arranged from the **smallest** to the **biggest**. 19 is the **smallest** number in this group. 40 is the **biggest** number in this group.

Write these numbers starting from the smallest on the lowest step to the biggest on the top of the steps.

15 7 3

11 20 9

35 16 28

20 15 42

27 24 29

38 28 48

Mathspeak

Which number will you place first when arranging in increasing order? Why?

For the Teacher

Keep mixed numbers in a bowl. Let three children come and pick up a number each. They should then stand in front of the bowl and arrange the numbers in either increasing or decreasing order as directed by the teacher.

SEA SHELLS ON THE SEA SHORE

Read the clues and colour the shells. Then write the number in the box.

- ★ These shells have the same number of tens and ones. Colour them **blue**.
- ★ These shells have no ones. Colour them **pink**.
- ★ These shells are more than 40. Colour them **green**.
- ★ These shells are a single digit number. Colour them **orange**.
- ★ These shells are more than 20 but less than 30. Colour them **red**.

33

2

Addition up to 20

Holiday time is fun time! It means visiting places, ice creams, and non-stop playing. What are your **three** favourite things about the holidays? If you have taken **2** bags of **10** books each to read during your holidays, **how many** books did you take?

Holiday Fun!

LOOKING BACK

4 children

2 more children join them

6 children in all

$4 + 2 = 6$
 Plus sign Equal sign

See: 4 and 2 is 6
 Write: $4 + 2 = 6$
 Say: 4 'plus' 2 equals 6

You can write addition in two ways.

$2 + 3 =$

$\begin{array}{r} 2 \\ + 3 \\ \hline \end{array}$

For the Teacher

The introductory picture can be used to ask questions like:

- How many coconuts do you see on both trees together?
- Two children are playing hopscotch. Two more children join them. How many students are playing in all?
- What shape do the wheels of the car remind you of?

NCF 2023

Competencies in this chapter:
 C-8.6: Applicable to the entire chapter
 C-8.12, C-8.13: Labelled on specific pages

COUNTING FORWARD TO ADD

Example: Abhay is making a card of pressed flowers. He has already stuck 5 flowers. He needs to stick 3 more to complete the card. How many flowers did Abhay use in all?

Count forward to add. Start with the bigger number.

$$5 + 3 = ?$$

$$5 + 3 = ?$$

Think 5

Count forward 6, 7, 8

$$5 + 3 = 8$$

Answer: Abhay used 8 flowers in all.

Ring the bigger number. Find it on the number line.
Count forward to add.

$$\begin{array}{r} 6 \\ + 2 \\ \hline \end{array} \quad \begin{array}{c} 6 \\ 7, 8 \end{array}$$

$$\begin{array}{r} 3 \\ + 4 \\ \hline \end{array} \quad \begin{array}{c} 4 \\ \text{---}, \text{---}, \text{---} \end{array}$$

$$\begin{array}{r} 2 \\ + 5 \\ \hline \end{array} \quad \begin{array}{c} \text{---} \\ \text{---}, \text{---} \end{array}$$

$$\begin{array}{r} 6 \\ + 1 \\ \hline \end{array} \quad \begin{array}{c} \text{---} \end{array}$$

$$\begin{array}{r} 4 \\ + 1 \\ \hline \end{array} \quad \begin{array}{c} \text{---} \end{array}$$

$$\begin{array}{r} 6 \\ + 3 \\ \hline \end{array} \quad \begin{array}{c} \text{---}, \text{---}, \text{---} \end{array}$$

$$\begin{array}{r} 3 \\ + 7 \\ \hline \end{array} \quad \begin{array}{c} \text{---}, \text{---}, \text{---} \end{array}$$

$$\begin{array}{r} 1 \\ + 5 \\ \hline \end{array} \quad \begin{array}{c} \text{---} \end{array}$$

$$\begin{array}{r} 2 \\ + 7 \\ \hline \end{array} \quad \begin{array}{c} \text{---}, \text{---} \end{array}$$

$$\begin{array}{r} 3 \\ + 1 \\ \hline \end{array} \quad \begin{array}{c} \text{---} \end{array}$$

$$\begin{array}{r} 9 \\ + 1 \\ \hline \end{array} \quad \begin{array}{c} \text{---} \end{array}$$

Example: Nishita read 4 books during her holidays. Then she read 3 more when school started. How many books did Nishita read in all?

$4 + 3 = ?$

You can use a number line to find $4 + 3$.

Step 1: Find the bigger number.

Step 2: Jump forward as many times as shown by the other number. The number reached is the answer.

Answer: Nishita read 7 books in all.

Solve.

Circle the bigger number. Then count forward with jumps.

$5 + 2 = \underline{\quad}$

$3 + 6 = \underline{\quad}$

$6 + 4 = \underline{\quad}$

7
3

5
3

6
2

7
2

8
1

For the Teacher

As this exercise is a preparation for counting forward, the numbers added are limited to 1, 2, 3.

Follow the pattern. Write the number combinations of 4

Did you know four is the only number spelt with the same number of letters as itself?

$$4 + 0 = 4$$

$$3 + 1 = 4$$

$$2 + \underline{\quad} = 4$$

$$1 + \underline{\quad} = 4$$

$$\underline{\quad} + \underline{\quad} = 4$$

Combinations of 5

Have you noticed there is always one more combination than the number itself? Find out if this is true for all the combinations.

$$5 + 0 = \underline{\quad}$$

$$4 + 1 = 5$$

$$3 + \underline{\quad} = 5$$

$$2 + \underline{\quad} = 5$$

$$\underline{\quad} + \underline{\quad} = 5$$

$$0 + 5 = 5$$

Mathspeak

Do you notice a pattern in the arrangement of the dots? Describe it.

FA

Combinations of 10

Colour the grid as shown to build all the number combinations of 10.

Solve.

1. Colour to show the addition fact $4 + 6 = 10$. Then make a story about the picture.

2. Ayush made 7 riddles on wild animals. Then he made 3 riddles on fish. How many riddles did Ayush make in all?

_____ riddles.

	7
+	3

ADDING THREE NUMBERS

Add in Any Order

You can add numbers in any order and still get the same answer.

$$3 + 4 + 2 = 7 + 2 = 9$$

or, 

$$3 + 4 + 2 = 3 + 6 = 9$$

or, 

$$3 + 4 + 2 = 5 + 4 = 9$$

Solve.

1. Add the underlined numbers first.

a. $\underline{1+2} + 5 = 3 + 5 = 8$

b. $\underline{4+1} + 2 = \square + 2 = \square$

$1 + \underline{2+5} = 1 + \square = \square$

$4 + \underline{1+2} = 4 + \square = \square$

$\underline{1+2} + \underline{5} = \square + 2 = \square$

$\underline{4+1} + 2 = \square + \square = \square$

2. Circle the numbers you are adding first.

a. $\begin{array}{c} 0 \\ 2 \\ + 7 \\ \hline \end{array}$

b. $\begin{array}{c} 3 \\ 2 \\ + 1 \\ \hline \end{array}$

c. $\begin{array}{c} 1 \\ 5 \\ + 3 \\ \hline \end{array}$

d. $\begin{array}{c} 2 \\ 5 \\ + 2 \\ \hline \end{array}$

e. $\begin{array}{c} 4 \\ 4 \\ + 1 \\ \hline \end{array}$

3. Colour 4 tops red, 1 blue, and the rest green. How many green tops are there? How many tops in all?

$$\begin{array}{c} 4 \\ 1 \\ + \square \\ \hline \end{array}$$
 Red tops
 Blue top
 Green top
 Tops in all

Look for a Ten

$$\begin{array}{r} 4 \\ 6 \\ + 5 \\ \hline 15 \end{array}$$

$$\begin{array}{r} 9 \\ 3 \\ + 7 \\ \hline 19 \end{array}$$

Circle the numbers that add up to 10. Then add.

2 6 + 8 +	3 7 + 4 +	1 9 + 2 +	8 6 + 4 +
10s 1s	10s 1s	10s 1s	10s 1s

Look for Doubles

$$\begin{array}{r} 3 \\ 3 \\ + 5 \\ \hline 11 \end{array}$$

$$\begin{array}{r} 6 \\ 2 \\ + 2 \\ \hline 10 \end{array}$$

Circle the doubles. Then add.

4 4 + 3 +	9 2 + 2 +	5 5 + 7 +	3 8 + 3 +
10s 1s	10s 1s	10s 1s	10s 1s

Action Exercise

Throw two dice. Add the numbers. Colour the circles with the answers. Do 10 times. If the number has already been coloured, take another chance.

2	3	4	5	6	7	8	9	10	11	12
---	---	---	---	---	---	---	---	----	----	----

Mathspeak

FA

In Q2 e (page 43), which two numbers will you add first and why?

TWO SINGLE DIGITS GIVING DOUBLE-DIGIT ANSWERS

$7 + 5 = ?$

This shows us that $7 + 5$ is the same as $10 + 2$.
So, $7 + 5 = 12$.

Add with the help of the tens frame.

$6 + 5$ is the same as

$10 + \underline{\quad}$

$6 + 5 = \underline{\quad}$

$7 + 6$ is the same as

$10 + \underline{\quad}$

$7 + 6 = \underline{\quad}$

$8 + 7$ is the same as

$10 + \underline{\quad}$

$8 + 7 = \underline{\quad}$

$5 + 8$ is the same as

$10 + \underline{\quad}$

$5 + 8 = \underline{\quad}$

$3 + 9$ is the same as

$10 + \underline{\quad}$

$3 + 9 = \underline{\quad}$

$4 + 8$ is the same as

$10 + \underline{\quad}$

$4 + 8 = \underline{\quad}$

For the Teacher

- Take strips of square-lined paper as shown.
- To solve $7 + 5$, colour 7 boxes in orange and 5 boxes in green as shown.
- Turn the strip upright to see the answer in tens and ones.

ADDING 10

Count the toys in the cupboard.

Worksheet

FA

Each strip has 2 parts with 10 circles each. Fill in the circles to find the answer to each sum.

$$8 + 6 = 10 + 4 = 14$$

$$7 + 5 = 10 + \square = \square$$

$$9 + 3 = 10 + \square = \square$$

$$6 + 7 = 10 + \square = \square$$

$$5 + 9 = 10 + \square = \square$$

$$9 + 6 = 10 + \square = \square$$

$$4 + 8 = 10 + \square = \square$$

COUNT FORWARD TO SUBTRACT

The postman from the Post Office on my street delivers letters.

Start with the smaller number 4. Count forward to 7.
 5, 6, 7 You have counted 3 numbers.

$$\begin{array}{r} 7 \\ - 4 \\ \hline 3 \end{array}$$

Circle the smaller number. Count forward to subtract.

$$\begin{array}{r} 8 \\ - 5 \\ \hline 3 \end{array} \quad \underbrace{6, 7, 8}_3$$

$$\begin{array}{r} 7 \\ - 5 \\ \hline 2 \end{array} \quad \underbrace{6, 7}$$

$$\begin{array}{r} 10 \\ - 8 \\ \hline \end{array} \quad \underbrace{9, 10}$$

$$\begin{array}{r} 9 \\ - 8 \\ \hline 1 \end{array}$$

$$\begin{array}{r} 5 \\ - 2 \\ \hline \end{array}$$

$$\begin{array}{r} 8 \\ - 6 \\ \hline \end{array}$$

$$\begin{array}{r} 4 \\ - 2 \\ \hline \end{array}$$

$$\begin{array}{r} 10 \\ - 7 \\ \hline \end{array}$$

$$\begin{array}{r} 9 \\ - 7 \\ \hline \end{array}$$

Mathspeak

While counting forward to subtract, we always begin with the smaller number. Explain why this is so.

FA

For the Teacher

Counting forward or counting up as a strategy for mental subtraction should be encouraged only when there is a difference of 1, 2, 3 between the two numbers being subtracted.

SUBTRACTION ON A NUMBER LINE

Example: The baker made 10 pastries.
He sold 3 of them. How many did he have left?

➡ $10 - 3 = ?$

You can use a number line to find $10 - 3$.

Step 1: Find the bigger number

Step 2: Jump back as many times as shown by the other number. The number reached is the answer.

Answer: The baker had 7 pastries left.

Subtract using the number line.

Mathspeak

Will $7 - 1$ give you an answer that is more than or less than $7 - 3$? Explain how you know.

$9 - 2 =$

$8 - 3 =$

$10 - 2 =$

7
- 1

1	0
-	4

9
- 3

7
- 2

8
- 2

For the Teacher

As this exercise is a readiness for counting back to subtract, the numbers being subtracted are limited to 1, 2, 3, 4.
